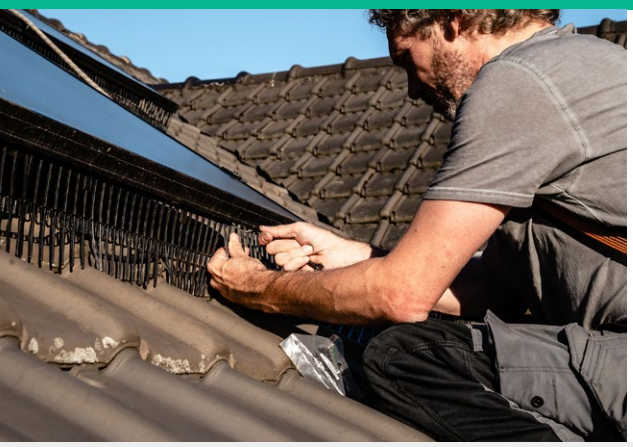
BIRDBLOCKER TOOL

BirdBlocker is the professional solution to guard against birds nesting under solar panels. Our specially designed tool will make installation even faster and easier. It also aids in the more secure fastening of the system to the panels because it allows for keeping the strips perfectly parallel to the panel during installation.

PRODUCT SPECIFICATIONS

- Material: Stainless Steel (1.4310)
- Handle material: Convenient rubber coating
- Length: 200mm, Width: 12mm, Thickness: 5mm
- Indicative weight per unit: 80 grams
- Wholesale quantity: 1 unit per package
- Retail quantity: 1 unit per package



ADVANTAGES

- Using the BB-Tool reduces strain on the fingers during installation
- The BB-Tool provides better guidance during installation for a more durable clamping
- The BB-Tool comes with a retracting roller. Made with a steel cable to hold your tool conveniently placed on your side

STARTERKIT

We strive to provide the best, easiest and most durable bird protection system on the market. With our background in installation, we are well connected with our customer base and use our and their experience to improve and expand our system daily. We know that a job done more accurately, in greater comfort and done quicker is good for installers and customers alike. To make your day-to-day working with BirdBlocker easier, faster and more precise, we developed the starter kit.

The starter kit consists of all tools you need to install BirdBlocker with your customers professionally:

1. Professional cutting shears for effortlessly creating crisp cuts, corners and edges around frames. These shears are made by Keizerskroon-Metallo - a leading manufacturer from the Netherlands that has been producing professional quality tools **since 1766**!

2. A high-quality holster that holds your shears and the tool safely while working on the roof. It is made from thick leather and securely clips to your pants or belt with ease. The holster ensures your tools are always within reach, where you expect them.

3. The BirdBlocker tool: Designed to make mounting BirdBlocker easier and faster. The tool is made from stainless steel ensuring a tight fit on the panels. Although mounting BirdBlocker with your hands is very doable, if you do this every day, the tool will make it a lot easier on the skin and fingers.

4. A long extending and retracting roller made with a steel cable to hold your tool conveniently placed on your side. You never miss when you grab for the tool, improving your efficiency in mounting BirdBlocker.

5. To complete the system and let you measure while mounting, we included a BirdBlocker professional folding ruler.

Our convenient kit saves you time, improves comfort and contributes to a more profitable and solid project.
